

## NEW

### WIN Lube-Free 5th Wheel Coupler Plate

One winner will be drawn from all reader response cards received in Land Line offices by Aug. 12, 2002.

### Lube-free connection

The PlateMate's scientifically engineered self-lube surface not only eliminates grease, it continuously outperforms grease for improved road handling performance, guaranteed. PlateMate promises improved road handling, especially in tight turns and coupling operations, while reducing the stress and strain of "steel grinding on steel" for your tractor and trailer. Even in bad weather conditions, drive-fire skids and bump steering are nearly eliminated. Over/under-steer also is significantly reduced providing safer, more controlled and more comfortable driving. It comes with a two-year guarantee. **Circle No. 196 on Response Card**

### Safely tarp a load

For protection and great looks, PullTarp's introduces the Ultimate Aluminum automatic arm tarp system for applications that require arms to deploy the tarp over a load. Key features include

low-profile arms with PullTarp's spiral torsion spring that will handle trailers

up to 40 feet and are available with side or underbody mounts. Ultimate Aluminum arm systems come complete with housing, arms, springs, motor, pre-wired dash panel safety breakers and 6-gauge wire. The pull-out model has a lifetime guarantee on moving parts, and the electric model offers a three-year prorated warranty on the motor. **Circle No. 197 on Response Card**

### Specialty gear

The Truck Safety Gear Company stocks a complete line of safety flags, wide load and oversize load banners, road tested to resist the worst

weather conditions, miles of highway abuse and perform when you need it the most, out on the road. The safety icons are hand constructed from durable, highly visible

fabric; rip-resistant wind stitching; dura-tough lettering; with your choice of time-saving mechanisms — brass grommets, wooden sticks, PVC, wire spreaders or bungee cords. **Circle No. 198 on Response Card**

### Fold & go bike

Truckers, could you use a bike that can take a beating? The Montague Corp. has developed its military folding bike used by troops in the Middle East for civilian use. The

Paratrooper is a 24-speed mountain bike that folds simply without the use of tools. By turning one release lever, the 29-pound bike compacts in less than 30 seconds into a 3-foot by 3-foot pack for easy portability and storage. Kickstands, a carrying case and folding pedals are available on request.

**Circle No. 200 on Response Card**

### Keep drains clear

The ClearDrain System is a complete replacement for air dryers on all vehicles and equipment (on road or off) utilizing compressed air. This solid-state system is self-cleaning, self-defrosting, self-lubricating, desiccant-free and operates with ignition control. This unique product is said to eliminate back pressure, carbon buildup and increase the

efficiency of the air compressor. ClearDrain needs no replacement and is virtually maintenance-free. The product protects all air system components and features a full five-year unlimited mileage/hour product warranty.
